Subject: building codes

Hi,

The only code I would want to see changed is for the one allowing too-large homes on small lots. There are two homes on Martin's Lane built after the smaller homes, which are way too large for the lot. They're on the right side of the street going towards the Post Office. One home which seems to be a boarding house, and other than turning into an eyesore, blocks all the sun of the small home next to it. The other two mega-homes on Nelson, in back of the 7th Day Adventist church, are very out of place, way to large for the property, and seem to have to green space around them. They look like small hotels. Each time I see any of these out of place properties, I wonder how they passed our zoning laws.

Thanks,
