

Summary of Public Comments on the Proposed Ordinance to Revise and Amend Chapter 5 (*Buildings and Building Regulations*)

#	Commenter	Date	Issue/Topic	Comment	Response/Change to Ordinance
1	Eric Mayl, P.E. (Via email)	4/30/2012	IBC Sec. 501.3	Mr. Mayl feels that adding a requirement for a stair adjacent to the main entrance of a building would aid fire department operation but is not warranted by any fire loss data and severely limits design options.	
2	Errol Nicholson Md. Master HVAC (Via email)	5/04/2012	HVAC equipment efficiency	Commenter was looking for clarification on Energy Star requirements for heating and cooling equipment. Commenter also asked if requiring heating and cooling equipment to be more efficient than the minimum standard set by the Department of Energy is allowed.
